

Panel 'AI/ML for Next Generation Wireless Networks'

Join us for a dynamic panel session exploring how Artificial Intelligence and Machine Learning are reshaping the landscape of next-generation wireless networks. Key topics include AI-native 6G network architectures, the role of AI/ML in Non-Terrestrial Networks (NTNs), and emerging real-world use cases.

Alongside these exciting technical frontiers, the session will feature inspiring stories from expert researchers with diverse backgrounds who are actively shaping the future of wireless communications and mobile networking. Their experiences will offer valuable insights and practical strategies for navigating and building a successful career in this fast-evolving field.

October 20, 2025

11:00 AM – 12:30 PM

WiMob 2025 - Marrakech, Morocco

Panel Speakers

- Carla Fabiana Chiasserini, Full Professor at *Politecnico di Torino, Italy*
- Maroua Drissi, Researcher at *Orange Labs Belfort, France*
- Giovanni Grieco, *Independent Researcher collaborating with academic and government institutions*
- Chrysa Papagianni, Associate Professor at *University of Amsterdam, Netherlands*

Panel Organizers

Dr. Francesca Meneghello - *Northeastern University, United States*

Dr. Arcangela Rago - *Polytechnic University of Bari, Italy*

Dr. Stefania Zinno - *University of Naples Federico II, Italy*

Be part of the discussion!
